Academic Projects

Title of Project: BeroZagaar Website Development
Federation University, Sydney

Aug 2018 - Sep 2019

- Objective:** To Create an interactive modern website using PHP for the Client's startup
- Tools:** Atom, Site-Ground Platform and VS Code Software was used to work on coding. Agile methodology, and PMP (Project Management Professional) tools such as Git and GitHub were used.
- Duties:** In a team of 4, I was elected as the Project Manager and Developer. My responsibility was to research the technologies and tools, scale the project with time-frame and plan this project. I choose Agile methodology and elected a team with a Scrum master. I also played a significant role in a product backlog and help manage the team with their respective objectives. One of my major roles was to give a pitch to attract clients and manage clients/stakeholder communication professionally.
- Result:** Academically, the team successfully achieved Distinction. Although scale of the project seemed to be challenging at first, the client was very satisfied with the end results. The tools being used in project was praised by the tutor. This demanding project gave me a chance to enhance many skills such as coding with best practice, writing professional documentation and effective communication with the client.
-
